PROFESSIONAL SUMMARY

PMP®-certified Planning and Cost Control Engineer with 14+ years of experience in civil engineering, specializing in municipal infrastructure, irrigation, and construction projects across Egypt and Saudi Arabia. Proficient in Primavera P6, EVM/CVR methodology, Power BI, and AutoCAD. Experienced in directing multi-disciplinary site operations, managing subcontractors, and delivering data-driven schedule and cost performance reporting to clients and senior management.

WORK EXPERIENCE

Planning & Cost Control Engineer / Project Manager

Aydah Jameel Al-Qahtani Establishment — Taif, Saudi Arabia | *2015 – Present*

- Managed full project lifecycle for municipal civil works including parks, landscaping, and housing complexes.
- Developed and maintained baseline schedules in Primavera P6; tracked progress and issued regular schedule performance reports.
- Executed cost control procedures through CVR (Cost Value Reconciliation) reporting to ensure project profitability and budget adherence.
- Conducted quantity take-offs, prepared updated BOQs, pricing analysis, and subcontractor evaluations.
- Formulated and submitted interim payment certificates while tracking project cash flow.
- Executed land surveying using Total Station and GPS for setting-out, as-built drawings, and site measurements.
- Coordinated between site teams, subcontractors, and client representatives throughout project execution phases.

Technical Office Engineer

Ministry of Water Resources & Irrigation — Egypt | *2012 – 2015*

- Oversaw quantity surveying, BOQ preparation, and cost estimation for civil and irrigation projects.
- Drafted interim payment certificates, variation orders, and full project documentation.
- Liaised between site teams and consultants; managed technical submittals and RFI responses.
- Performed land surveying operations using Total Station and GPS equipment on Nile protection and riprap projects.

EDUCATION

Bachelor of Science in Civil Engineering

Mansoura University, Egypt | 2007 – 2012

KEY ACHIEVEMENTS

- Successfully delivered multiple concurrent municipal infrastructure projects on schedule and within approved budgets.
- Implemented systematic CVR cost control framework that improved financial visibility and proactive budget management.
- Developed Power BI dashboards integrating Primavera P6 data to provide real-time project performance analytics.
- Applied EVM (Earned Value Management) principles to early-identify schedule and cost deviations and recommend corrective actions.
- Maintained consistent quality standards across contractor scope management and technical office operations.
